Steven De Costa

Kk :)

Oct 05, 2024 1:51:08 pm

Doeun Han

Thanks a lot. After today's meeting, it would be great if you drop the comment on the meeting minutes!!

Oct 05, 2024 1:50:51 pm

Steven De Costa

Ok, so I have dropped comments for issues 66 and 67.

Let me know if there are others you'd like to see comments on :)

Oct 05, 2024 1:43:50 pm

Steven De Costa

Let's use gmeet if that is ok with everyone. It at least helps with documentation to get the feedback and such.

Comp8715-Group-Accelerating

And, I'm about to jump in and provide comments and such :).

Sep 28, 2024 11:11:28 am

Steven De Costa

Awesome.

See you folk there!

I'm just doing a call with a chap in New Jersey starting in 5 min and after that I'll review github and such :)

Sep 28, 2024 11:10:40 am

Diao Fu

yeah!

Sep 28, 2024 11:09:24 am

Steven De Costa

I'm easy either way. What would the team prefer?

If we do a catch up at the Hive then I might ask if we could meet at 4pm instead of 3pm.

I have some CKAN pins for each of you and it might be handy to do a group photo for anyone happy to be I'd then put up on LinkedIn tomorrow or early next week.

So... 4pm at the Hive?

Possible?

Sep 28, 2024 10:57:32 am

Diao Fu

hi @Steven De Costa, do we have gmeet or hive meeting today?

Sep 28, 2024 10:46:51 am

Doeun Han

<https://github.com/DiaoFu/Accelerating/issues/66> Steven,

Qifeng has written the meeting summary for today as outlined above. We would appreciate it if you could p any comments on the summary. Specifically, the tutor has expressed ongoing concerns about how our data task aligns with delivering value to the client. If you could address this aspect, we will use your comments to the matter further with the tutor. Thank you so much for your guidance in advance.

Sep 14, 2024 3:55:59 pm

Doeun Han

I didn't mention that part. you can check out the main point from today's meeting in our github issue as I h
you

Sep 14, 2024 3:55:52 pm

Steven De Costa

Please remove the part about my friend sharing data from one of his businesses as I just realised he has oth going on ;)

Sep 14, 2024 3:54:46 pm

Steven De Costa

Kk :)

I've added the pre meeting feedback and will now share access to the meeting vid and transcript :)

Sep 14, 2024 3:53:37 pm

Doeun Han

Main Points of the Meeting:

Sharing Past Progress: Discussed the completion of the data collection phase and shared the upcoming ana progress.

CKAN Utilization: Identified the need for two reflective documents related to CKAN—one regarding the inst process and the other on API utilization.

Engagement with the CKAN Community: Discussed the current use of CKANGPT and considerations on its application, as well as proposed comparisons with other forms of community engagement.

Sep 14, 2024 3:52:50 pm

Doeun Han

Steven, I have summarized today's meeting into three main points as follows. Currently, we are considering can better utilize CKAN and how each team member can be more involved in this process. We will share ou once it becomes more concrete. Additionally, we anticipate that more interactions with the CKAN communi needed in the remaining three weeks. Besides using CKANgpt as you mentioned, we would appreciate any whether there are other ways we can effectively engage with the community, beyond just using Gitter, or hc utilize Gitter more efficiently. It would be great if you could leave your feedback on this on GitHub.

Sep 14, 2024 3:52:42 pm

Doeun Han

<https://github.com/DiaoFu/Accelerating/issues/50>
<https://github.com/DiaoFu/Accelerating/issues/50>

Sep 14, 2024 3:38:18 pm

Doeun Han

The link to the issue board related to today's meeting, where we would like you to write your feedback, is p below.

Sep 14, 2024 3:38:12 pm

Doeun Han

You don't need to upload the meeting transcript to GitHub. It would be fine if you could just share it with us. For the feedback, we would appreciate it if you could add it to our GitHub as you mentioned. Additionally, we will summarize today's meeting and outline our future plans, and then upload it. It would be great if you could provide feedback again at that time. The tutor wants to check if the meeting minutes we uploaded have been approved by the client.

Sep 14, 2024 3:37:55 pm

Steven De Costa

I'm still waiting for the meeting transcript and recording... it should be delivered after the meeting period ends at 5pm...

But yeah, I'll put together the feedback above with notes from the meeting and add that once it arrives :)

Sep 14, 2024 3:32:57 pm

Doeun Han

gmeet is gonna be a better option for all of us

Sep 14, 2024 10:56:29 am

Steven De Costa

And yes, I'll load all this up later today.

Will we meet at 3pm today at Hive or does the team want to do a gmeet again so that the video and conversation can be captured in full?

Sep 14, 2024 10:52:03 am

Steven De Costa

While I have suggested that some of my team will provide some expert testing and advice, it is also a good idea for folks like yourselves to generate some advice and feedback.

Reciprocity matters, so when you see someone put things in the public domain to see feedback, then the way you can do is help them with feedback :)

Sep 14, 2024 10:50:41 am

Steven De Costa

**Surya Kandukuri** · 1stBuilding ISB India Data Portal and Data Products at
Bharti Institute of Public Policy

2w · Edited ·

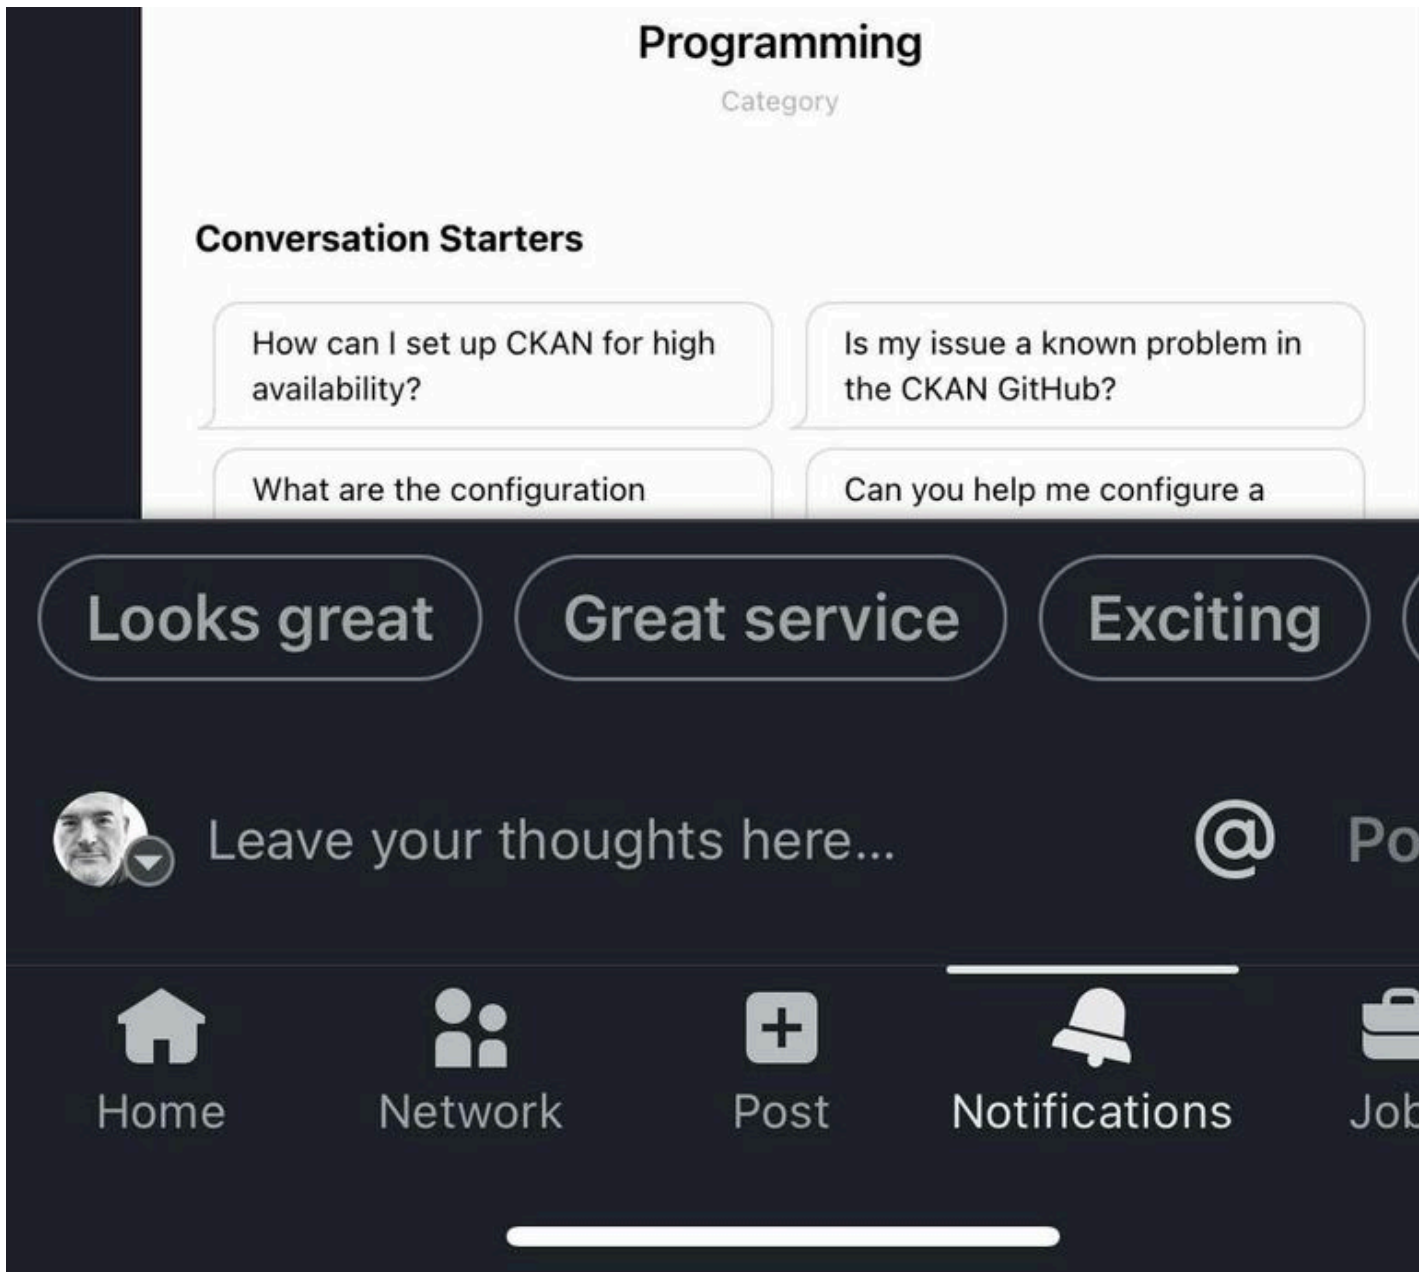

Hello **CKAN** and **Datopian**, We have developed the India Data Portal using ckan as a microservice. Also, it would help many if we could have a GPT to help us troubleshoot issues related to ckan. Here is CKANGPT with the context of all documentation, issues, public ckan extensions, etc. I would love to add more context to this. Please test it out and let me know. Please feel free to reach out if you are interested.

Looks neat [Surya Kandukuri](#) and I'll take a look at it in detail for sure :) It might be a great idea to have such a GPT for folks that would like to learn and interact more with CKAN in a facilitated and AI assisted way. The only caveat is that the logo and trade mark for CKAN is owned by [Open Knowledge Foundation](#) and any such representation would really need to move toward some kind of 'official' status. ...see more

Steven De Costa lol - it both does and doesn't. The inline link is ok but the 'pos link is the generic GPT URL.

Sep 14, 2024 10:48:44 am

Steven De Costa

Yep.

I can load it up there a bit later today.

Btw, this is the feedback I gave the chap in India:

<https://chatgpt.com/share/8e447a6f-1889-459a-b4a4-6908f3173c63>
<https://chatgpt.com/share/8e447a6f-1889-459a-b4a4-6908f3173c63>

Sep 14, 2024 10:48:07 am

Doeun Han

Thanks for your comment. Is it possible to mention these in our git issue that I have sent the link?? We would show the interaction to tutors.

Sep 14, 2024 10:46:27 am

Steven De Costa

To use the GPT you probably need a subscription, so this might not be something everyone can use easily. I maybe a few of you have a paid account.

Sep 14, 2024 10:42:55 am

Steven De Costa

More general feedback for the team is that an opportunity to collaborate with the community has arisen. If on LinkedIn you can find and connect with me there and you'll see that I've had some discussion with a CKAN based in India that is seeking feedback on an openAI GPT he has created for the CKAN community.

Epistemic AI conversational agents like this would be good to compare with the community support the team also be using via gitter or stackoverflow.

The CKANGPT is loaded with CKAN's github discussions, the docs, the dependency docs for things like Solr than a decade of blog posts.

It is far from perfect and you will see my own feedback to the guy who published it on LinkedIn.

Sep 14, 2024 10:41:48 am

Steven De Costa

These two docs are a good start at what might be understood as user documentation but were you planning any commentary?

It could be as simple as, I found the process of creating an organisation straightforward but xxx would have easier for a first time user.

Or, you might suggest that the first time the app is logged into by the super admin that a guided process could be implemented. Or, that a setup checklist could be used for 'update logo, update social links, update site description etc'.

Listing challenges, impressions and suggestions would make such a document more than just a guide or log of functions.

Two other docs of the type you have begun would make sense too.

One for the actual installation process. And, one for the CKAN API.

I can see there is a plan to do some additional guides for some of the data views but perhaps you can use the

plugins from `api/action/status_show` and mention each of these too.

Generally, it looks like the site is working and you have xloader with 2.11 running. You might have some issue:8888 for API requests from external apps, so you might want to check that. And, you should use an SSL certificate to connect via `https://`

Either the SSL or the 8888 causes Datashades.info to fail to index the site. It would be handy to show a success message for this indexing.

Sep 14, 2024 10:33:55 am

Steven De Costa

Thanks!

I've been super busy the last few days and will review and catch up on everything tomorrow morning. I hope it's ok. I'm still working to meet a deadline currently.

Sep 13, 2024 3:20:24 pm

Chuang Ma

I would appreciate it if you could guide us on what we should do next to better achieve the project's objectives. I wrote two Google Docs: "ckan_manage_front" and "ckan_manage_back". Below are the links to the documents.

Sep 13, 2024 3:20:04 pm

Chuang Ma

I have successfully set up CKAN, and I selected 7 organizations from the U.S. Government's Open Data (<https://data.gov/>). I placed some of the "datasets" from each organization into our system 'ckandemo'. I have documented what I've done in two documents, and I am currently working on demonstrating all the features of CKAN. However, it is too basic, and in my opinion, it doesn't fully align with the goals you initially set. The .gov means it's official. Federal government websites often end in .gov or .mil. Before sharing sensitive information, make sure you're on a federal government site.

<https://data.gov/>

Sep 13, 2024 3:19:45 pm

Chuang Ma

As you previously mentioned in the document, "Our objective is to develop a Proof of Concept (PoC) that demonstrates how CKAN can enhance data management, policy analysis, and decision-making processes in sector operations through improved data for policy workflows."

Sep 13, 2024 3:19:30 pm

Chuang Ma

Good afternoon steven 😊

Sep 13, 2024 3:19:20 pm

Doeun Han

Hello, Steven, the below link is our agenda for this week meeting. Please see it and make some comment on <https://github.com/DiaoFu/Accelerating/issues/50> Since we need to record the interaction with you in our repo so it would be helpful for you to make some comment on it.

<https://github.com/DiaoFu/Accelerating/issues/50>

Sep 12, 2024 5:06:32 pm
